

INTROCONDUIT

Increment 4 Report

Project Group: 8

CS551: Advance Software Engineering

1. **Implementing the API service for counseling centers so that a user can look into the location of counseling centers.**
2. **Develop the front end for the application.**
3. **Youtube Video .**

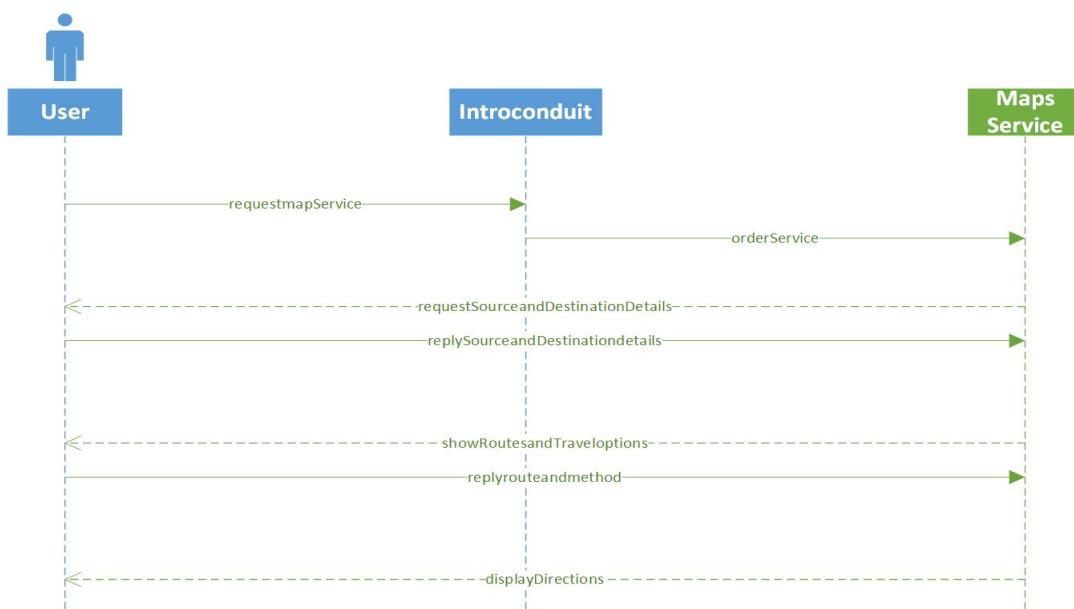

Direction Service:

Description:

The Google Directions API is a service that calculates directions between locations using an HTTP request. You can search for directions for several modes of transportation, include transit, driving, walking or cycling. Directions may specify origins, destinations and waypoints either as text strings (e.g. "Chicago, IL" or "Darwin, NT, Australia") or as latitude/longitude coordinates. The Directions API can return multi-part directions using a series of waypoints.

We use this API to include direction service to psychology centers and hospitals for the user, so that he would find the direction from his location.

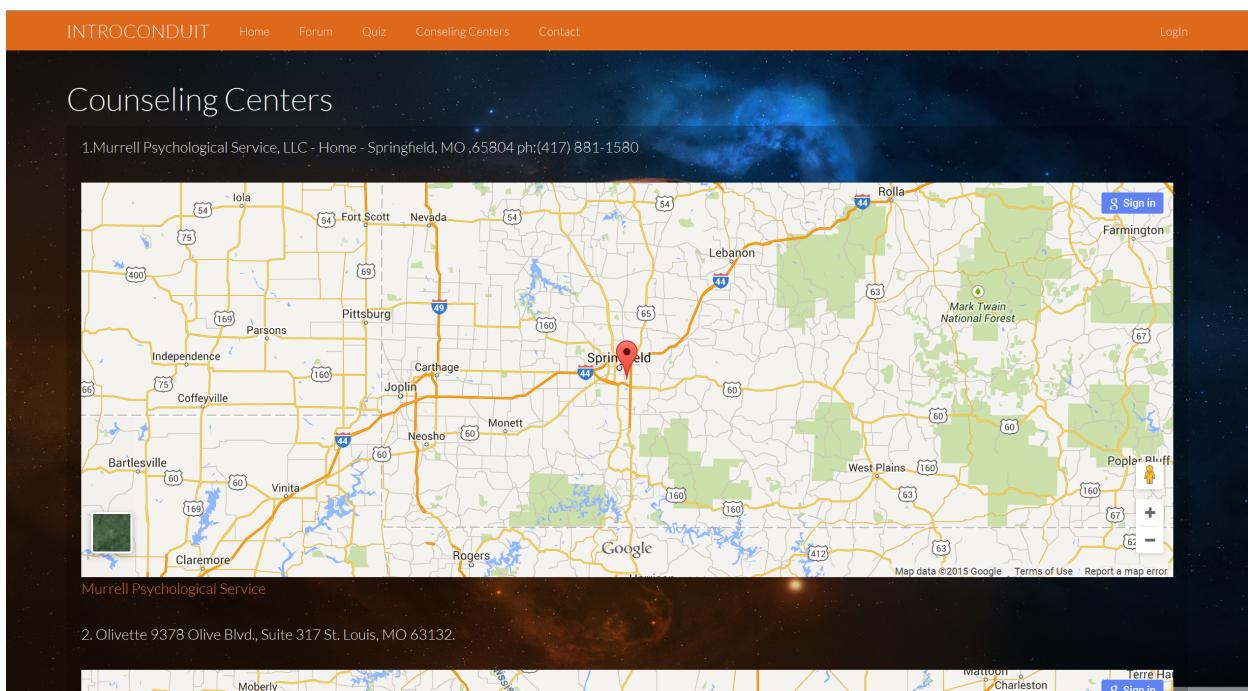

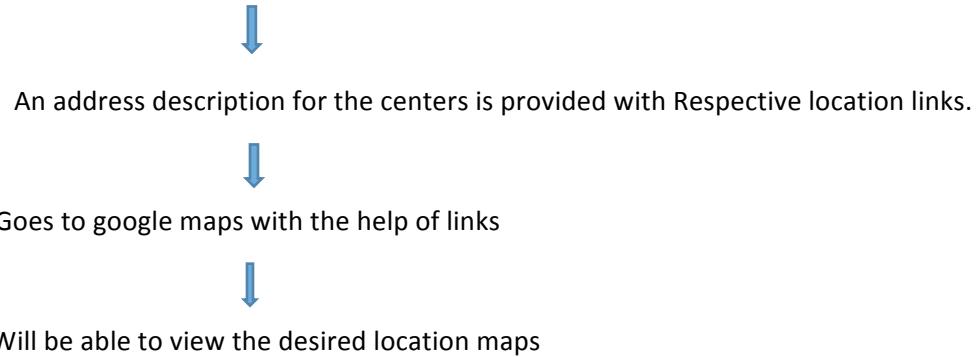

Sequence Diagram:

Operational Description: A registered user or a non-registered user will be able look into hospitals and psychology centers. As the user enters the webpage he/she is provided with an option for location services where details of some counseling centers are provided with link for their respective locations.

Constraints/Exceptions: Both Registered and non-registered users will be able use the location services.

Service Flow: User who would like to go to counseling centers.

4. Front End:

Front End of the web application was developed by using HTML 5, CSS 3, JavaScript. We used Bootstrap for the development. Bootstrap helps in creating responsive web page's.

Bootstrap has become one of the most popular front-end frameworks and open source projects in the world.

Lot of Effort was put into the development of the user interface of the website. It is Simple and crisp and is very warm and welcoming.

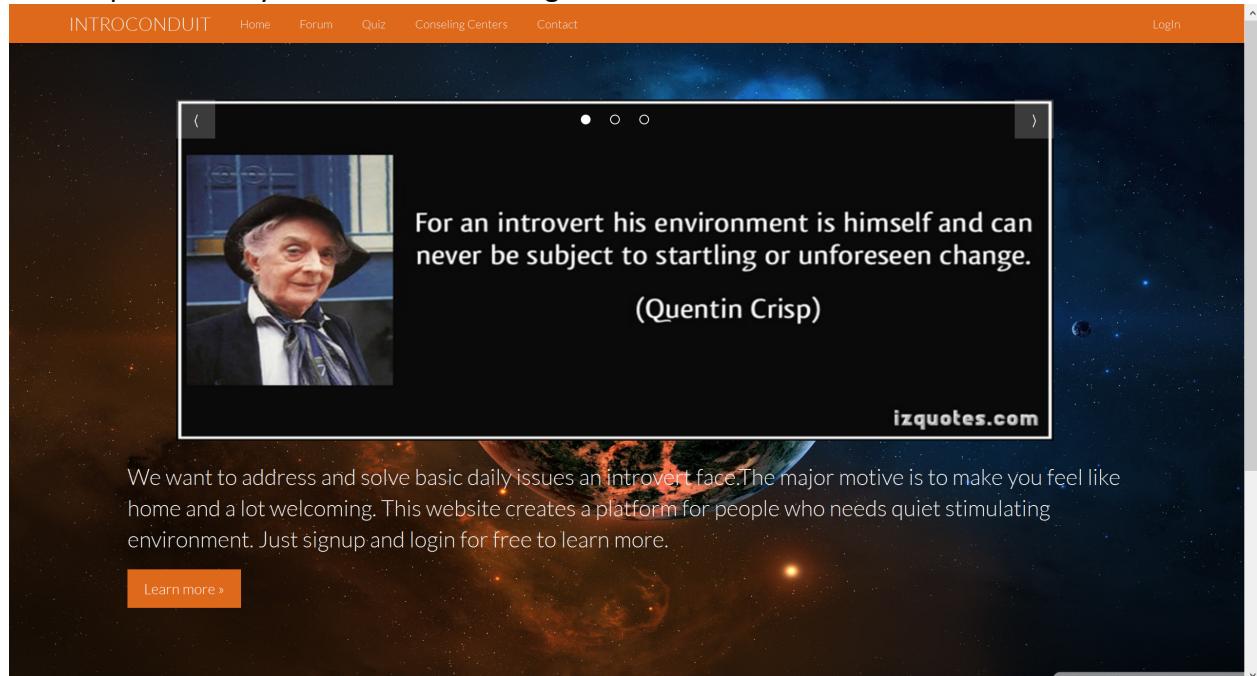

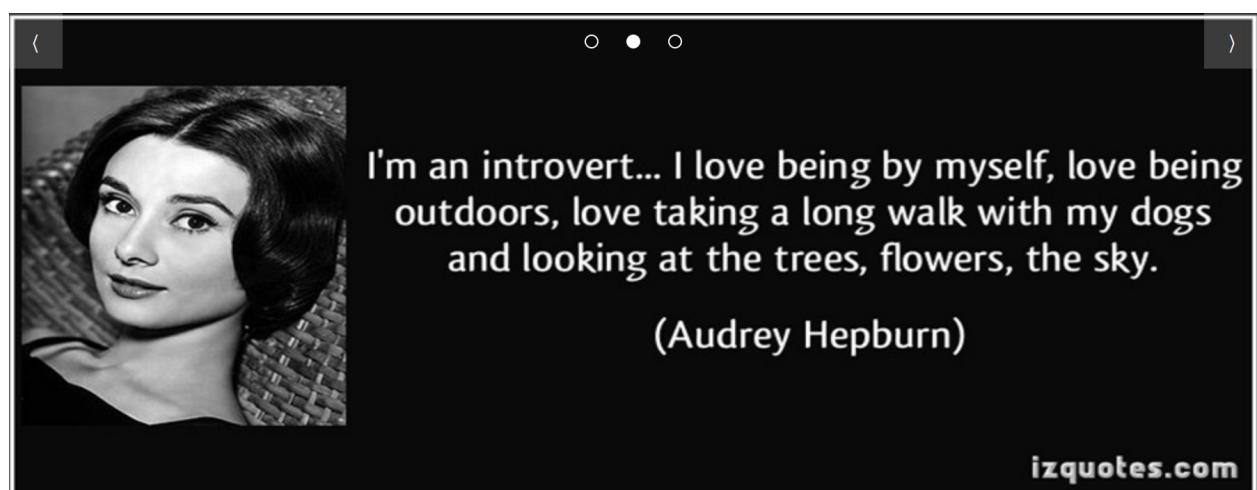

Image Slider: Created the slider using javascript functions and HTML , CSS .

Who are Introverts exactly

"Our culture made a virtue of living only as extroverts. We discouraged the inner journey, the quest for a center. So we lost our center and have to find it again." ~Anais Nin

The world is a better place when introverts stay true to who they are. In a world that favors extroversion, introverts are often left to wonder, "is there something wrong with me?" This is unfortunate because introverts are awesome and we have so many valuable gifts to offer the world.

It's time for introverts to stop trying to be extroverts and start embracing the virtues of introversion

The mission of Introvert Conduit is to help introverts quietly revolutionize the way they see themselves. A quiz which really helps to evaluate your personality, a forum to discuss and with our personal advice in it, a list of counselling centers if you really need a help and list of wonderful books and videos to peek in are created with this purpose in mind.

Blog Posts

Told from the perspective of bold introvert, different blog posts which share personal stories and practical advice related to being introverted are provided

Introvert Resources

Ever thought you should check your personality once again? Wondered whether you should see a counselor? Ever felt you should know more about your personality and embrace it by reading a book? These resources are also a great tool for helping people understand introversion. The resources are meant to make you think or make you reflect – or both.

Discussion

All posts and articles on blog aim to stimulate discussion about introversion. Please feel free to leave your question and start discussing in our productive blog

What to know whether you are an introvert or not

Well, Introverts are people who primarily look inward, paying close attention to their thoughts and emotions. It's not that they are incapable of paying attention to what is going on around them, it's just that their inner world is much more stimulating and rewarding to them.

You might be one if you are drained by social encounters and energized by solitary, often creative pursuits. Their disposition is frequently misconstrued as shyness, social phobia or even avoidant personality disorder, but many introverts socialize easily; they just strongly prefer not to. In fact, the self-styled introvert can be more empathetic and interpersonally
